

NOAH PRED

ecocosm

After over thirty releases to date on labels across the globe, Toronto-based producer Noah Pred joins the New Kanada roster with a work of unusual scope. Originally produced as a live set for Vancouver's New Forms Festival, *Ecocosm* was generated *entirely* from field recordings collected in the coastal wilderness of British Columbia – though you might not notice if we hadn't told you. Spanning deep minimal grooves to advanced dance floor workouts, the resulting productions are as much a testament to the digital process as they are to the source of the sounds.

Ecocosm will be available August 3rd, 2007 as a digital full-length exclusively on www.beatport.com.

1. Chloroplast
2. Protonema
3. Tsuga
